

# Phase 1 – Locations (Human and Physical Comparisons)

## Human and Physical Features

**HUMAN FEATURES** are features of our world that have been made by humans.

**PHYSICAL FEATURES** are features of our world that have been created by nature.

## Woodland, Hedgerows and Meadows

In the UK, there are different types of woodlands. Thousands of years ago, most of the UK was covered in woodlands so they are home to thousands of species of plants and animals. As well as trees, many other plants have woodlands as their habitat. On the woodland floor, many flowers grow, particularly in spring. These flowers can grow even with the limited sunlight that gets through the trees.

## Key Vocabulary

**AERIAL PHOTOGRAPH:** A photograph taken from the air.

**CITY:** A large town.

**CLIMATE:** Climate is the average, typical weather of a place.

**EQUATOR:** an imaginary line around the middle of the Earth at an equal distance from the North Pole and the South Pole.

**SETTLEMENT:** A place where people live and work and can be big or small, depending on how many people live there.

**TOWN:** A place with many streets and buildings, where people live and work. Towns are larger than villages and smaller than cities.

**VILLAGE:** A group of houses, together with other buildings such as a church and a school, in a country area.

**WEATHER:** Weather is the day to day changes that we see happen. So, it can be sunny one day and rainy the next.

## Aerial Photographs

Northampton

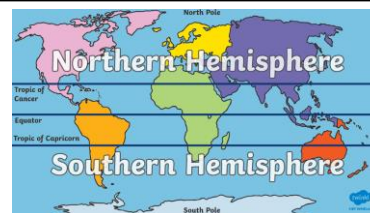

London

New York City

## Hot and Cold

### Cold or Polar Climates

Finland

Arctic

Norway

Greenland

### Warm Climates

Australia

North Africa

Middle East

Mexico

Countries have different types of 'climate' around the world; they can be **hot** or **cold**.
